DigiWheel — Reinventing the Wheel

DigiWheel revolutionised the gambling industry by literally reinventing the wheel. DigiWheel has created the technology of a two-metre rotating high-definition screen to offer customised and adaptable wheel-based solutions for casino gaming, marketing, and entertainment on a single device.

For the first time in the industry, casinos can seamlessly integrate revenue-generating opportunities, attract new customers, and present unique gaming and entertainment experiences. With DigiWheel's versatile setups of tables and terminals, along with standalone promotional wheels, land-based casinos can boost their product offering with attractive solutions tailored to meet the diverse needs of their players.

At DigiWheel, our vision is clear: To witness the DigiWheel in every major gaming facility globally. Fuelled by this vision, our mission is to deliver the most attractive and engaging wheel-based gaming, promotions, and entertainment for customers worldwide through the unparalleled capabilities of the DigiWheel.

Joining the Evolution Group

Evolution Group acquired DigiWheel in 2021. This strategic move enhanced Evolution's online gaming portfolio, incorporating DigiWheel's innovative digital technology into Evolution's Live Casino games and Game Shows, which already include successful wheel-based games like Dream Catcher and Crazy Time.

The DigiWheel, a one-of-a-kind, fully rotating high-definition gaming wheel, further elevates Evolution Group's capabilities, by serving as an HD screen capable of running various money wheel or prize wheel games, including Evolution's renowned game show wheel content.

Within the Evolution Group, DigiWheel now operates as a distinct brand, contributing to the diverse product offering for land-based operators alongside Evolution, NetEnt, Red Tiger, Ezugi, Big Time Gaming, and Nolimit City.

Evolution Group, the world's leading online casino supplier, collaborates with an extensive network of over 700 operators, including major Tier-One online platforms and land-based casinos. With more than 18,000 workers worldwide, our parent company, Evolution Group, listed on Nasdaq Stockholm, positions us as an essential player in the industry. Constantly anticipating and adapting to evolving markets, we empower our customers to secure early market share in new and re-regulating territories.

The DigiWheel

The DigiWheel is a two-metre rotating high-definition screen. This advanced solution is designed to empower operators with the capability to host a wide array of wheel games, execute multi-tier promotional activities, and seamlessly integrate the presentation layer for showcasing TV broadcasts, live streams, promotions, and other marketing materials. Operators can choose from 3, 6, 9, 18, 27, or 54-segment layouts on the wheel to run promotions based on specific criteria such as the number of prizes or participants.

The DigiWheel's non-rotating centre allows uninterrupted use of a predetermined screen section, enabling operators to consistently run promotions, advertisements, or marketing messages, captivating the attention of onlookers as the wheel spins. Furthermore, this feature is a strategic tool for engaging clients, potentially leading to increased casino Customer Service Management (CSM) sign-ups. The DigiWheel effortlessly accommodates various feeds, including HDMI, live stream, webpage, offline still image and video formats (such as .jpeg or .mov), and more, allowing for direct and dynamic display on the screen.

DigiWheel with Terminals

This is our standard premier gaming configuration, and it combines the two-metre DigiWheel with five terminals, creating an unparalleled gaming experience. The terminals are meticulously designed for ergonomic comfort, providing players with an optimal environment to enjoy world-class games.

Paired with the exclusive branded Evolution-developed Dream Catcher, the inaugural title in DigiWheel's eGameshow Category, this setup offers a captivating game with straightforward rules, making it highly appealing to slot players. Players can immerse themselves in the gaming action through a multi-camera studio installation. The game presenter spins the wheel and interacts with players throughout. Players simply bet on the number they think the DigiWheel will stop at: 1, 2, 5, 10, 20, or 40. If the player places a bet on the winning number, they receive a corresponding payout, e.g. 1 to 1, 2 to 1, 5 to 1, and so on).

Evolution Games on the DigiWheel

Crazy Time

Crazy Time is an extremely popular online game show based on Evolution's immensely successful Dream Catcher money wheel concept. Crazy Time takes excitement to unprecedented levels, allowing players to incorporate multipliers from the Top Slot in each game round and engage in four Bonus games.

With a perfect blend of entertainment and advanced RNG gameplay, Crazy Time delivers a truly unique player experience. Adding multipliers up to an impressive 25,000x elevates the enjoyment to new heights.

The dynamic and action-packed gameplay focuses on the main game and four bonus games. It is easy to play as players place bets on numbers (1, 2, 5, or 10) and the Bonus games. Notably, two Bonus games present players with decisions that add an extra layer of excitement, introducing a dynamic element where players no longer consistently win the same prize. The giga-hit Crazy Time promises an unparalleled gaming experience, combining innovation, strategy, and high-stakes excitement for players seeking extraordinary fun.

The Evolution Experience

The Evolution Experience is a collection of well-known online casino games debuting in land-based casinos. By bringing the renowned quality of Evolution studios to casino floors globally, a truly distinctive and innovative game portfolio emerges, providing land-based casino customers with a fresh and exhilarating experience.

The entertainment, excitement, and captivating ‘theatre’ of the Evolution Experience on a casino floor attract new customers while offering an extraordinary range of products. Meticulously designed to complement traditional casino floors, this setup bridges land-based casino experiences with the unlimited potential of online digital technologies.
